

**Millbrook Events Environmental Policy Statement:**

As part of GM's global commitment to the environment, Millbrook Events shares this responsibility for protecting human health, natural resources, and the global environment. We do this by the application of GM Environmental Principles and that of ISO 14001:2004 in our processes and daily business.

**GM Environmental Principles:**

As a responsible corporate citizen, GM is dedicated to protecting human health, natural resources, and the global environment. This dedication reaches further than compliance with the law to encompass the integration of sound environmental practises into our business decisions. The following environmental principles provide guidance to GM personnel worldwide in the conduct of their daily business practices.

This will be accomplished through the following environmental principles:

- We are committed to actions to restore and preserve the environment.
- We are committed to reducing waste and pollutants, conserving resources, and recycling materials at every stage of the product life cycle.
- We will continue to participate actively in educating the public regarding environmental conservation.
- We will continue to peruse vigorously the development and implementation of technologies for minimizing pollutant emissions.
- We will continue to work with all government entities for the development of technically sound and financially responsible environmental laws and regulations.
- We will continually assess the impact of our plants and products on the environment and the communities in which we live and operate with a goal of continuous improvement.

Miguel Fragoso

Managing Director November 2009
